TABLE OF CONTENTS

INTRODUCTION

CHAPTER 1 General introduction

TECHNICAL SECTION: DEVELOPMENT AND VALIDATION OF CT DETECTION AND GENOTYPING ASSAYS

CHAPTER 2 A highly sensitive, multiplex broad-Spectrum PCR-DNA-enzyme immunoassay and reverse hybridization assay for rapid detection and identification of *Chlamydia trachomatis* serovars.

CHAPTER 3 evaluation of a novel PCR-based assay for detection and identification of *Chlamydia trachomatis* serovars in cervical specimens.

CHAPTER 4 comparison of the *Chlamydia trachomatis*-DT genotyping assay and Omp1 sequencing among different clinical samples from men and women.

CHAPTER 5 Evaluation of a novel Ct microsphere suspension assay for detection and genotyping of the different serovars in clinical samples.

NATURAL HISTORY: EPIDEMIOLOGY AND SEROVAR DISTRIBUTION OF C. TRACHOMATIS

CHAPTER 6 *Chlamydia trachomatis* serovar distributions in Russian men and women: a comparison with Dutch serovar distributions correlated with ethnicity.

CHAPTER 7 Analyses of multiple site and concurrent *Chlamydia trachomatis* serovar infections, and serovar tissue tropism for urogenital versus rectal specimens in male and female patients.

CHAPTER 8 Anal infections with concomitant *Chlamydia trachomatis* genotypes among men who have sex with men in Amsterdam, the Netherlands.

CHAPTER 9 Significantly higher serological responses of *Chlamydia trachomatis* B group serovars vs. C and I serogroups.

THE ROLE OF C. TRACHOMATIS IN CERVICAL (PRE)MALIGNANT LESIONS

CHAPTER 10 *Chlamydia trachomatis* and risk of prevalent and incident cervical premalignancy in a population based cohort.

CHAPTER 11 Comprehensive analysis of Human Papillomavirus and *Chlamydia trachomatis* in in-situ and invasive cervical adenocarcinoma.

DISCUSSION AND CONCLUSIONS

CHAPTER 12 General discussion and conclusions
